Election/Restrictions

1. Applicant's election of the species shown in figures 14A-C in the reply filed on 5/20/08 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. Claims 11, 12, and 15-50 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 5/20/08.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 2, 4-6, 8, 9, 13, and 14 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Jungkind (6138385).

Jungkind shows a shoe comprising a rear and toe portion with an intermediate portion (4') which is length adjustable and includes openings which extend vertically through the intermediate sole layer (the holes formed to allow the passage of element 11.1) as claimed.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 51, 52, 54-56, 58, 59, 61, and 62 are rejected under 35 U.S.C. 103(a) as being unpatentable over Smith (2112052) in view of Jungkind (6138385).

Smith shows a sandal with a length adjustable sole substantially as claimed except for the exact means for adjusting the length of the sole. Jungkind teaches a length adjusting means comprising a sole having a rear and toe portion with an intermediate portion (4') which is expandable and retractable and includes openings which extend vertically through the intermediate sole layer (the holes formed to allow the passage of element 11) as claimed. It would have been obvious to use the length adjustable sole as taught by Jungkind in the sandal of Smith to provide a easy and more diverse length adjusting means.

Allowable Subject Matter

7. Claims 3, 7, 10, 53, 57 and 60 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

8. Applicant's arguments filed 11/4/08 have been fully considered but they are not persuasive.

In response to applicants arguments directed towards Jungkind, the jointed area does shown openings (holes through which element 11 passes through) which passes vertically (i.e. from the top surface of element 4 to the bottom surface of element 4) through element 4 as claimed.

In response to applicants' argument directed towards the screw device of Jungkind being infinitely adjustable, the screw inherently has fixed stepped predetermined positions based on the amount of turns of the screw, i.e. distance between the threads of the screw.

Conclusion

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
